

A world map illustrating the global distribution of the Air Quality Index (AQI) in 2015. The map is color-coded based on the AQI scale, ranging from green (Very Clean) to red (Very Polluted). The legend at the bottom left shows the color scale: green for 'Very Clean', yellow for 'Clean', orange for 'Moderate', red for 'Unhealthy for Sensitive Groups', and dark red for 'Very Polluted'. The map shows that North America, Australia, and parts of Europe and Asia are predominantly green/yellow, indicating better air quality. Large areas of China, India, and parts of Africa and South America are colored red, indicating severe air pollution.
